# FLOWPRESS

Liquid Solid Separation

# Agricultural Water / Solids Management

## PROBLEM

We start with a water / solids problem, such as an impound, or any jobsite that has unwanted solids that are too wet to be landfilled.

## FLOWPRESS

At Flow Press we strive to provide you with complete waste / solids management solutions so that you can reuse your water and properly manage your solids.

← Water for Reuse

Solids for recycling, fertilization, reuse for many applications. →

After filtration, we provide further separation solutions to separate Nitrogen and Phosphorus nutrients through reverse osmosis!

## PROBLEM SOLVED

Next, we size the right filter press suited to your needs, your processing schedule and your automation requirements.

- Short delivery times
- Mobile or stationary systems

## SOLIDS TREATED

We treat slurry from Agricultural Farms, Ponds, Groove and Grind, Concrete, Metals Manufacturing, Oil & Gas, Mining and Organic Materials. Our goal is to get the cleanest and clearest effluent and the driest solid cakes for easy disposal or recyclable uses.
